The Department has established a state-of-the-art experimental facilities and laboratories in different fields of Civil Engineering. The Department strongly believes in continuous efforts to strive for excellence by exploring new frontiers of knowledge, imparting the latest technical knowledge to the students and conducting high quality research.

About the FDP

Learner-centric pedagogy within the context of Outcome-Based Education prioritizes the individual learner's needs and actively involves them in the learning process. By promoting personalization, active engagement, and continuous improvement, this approach seeks to prepare learners for success in a rapidly changing and diverse world.

Learner-Centric Pedagogy in Outcome-Based Education (OBE) represents a paradigm shift in educational approaches, emphasizing the centrality of the learner in the teaching and learning process. OBE is a systematic and dynamic model that focuses on defining clear learning outcomes and aligning instructional strategies to achieve those outcomes. Within this framework, learner-centric pedagogy places the individual learner at the forefront, recognizing their diverse needs, learning styles, and prior knowledge.
